Part of the frieze on the internal facade of the National and Kapodistrian University of Athens central building. The fresco of the frieze shows the pantheon of Greek history. This part depicts personified Rhetoric, Poetics, Mathematics, History, Archaeology, Philosophy, Legislation, Medicine, Theology, Astronomy and Physics, surrounding and glorifying King Otto who is sitting on his throne

Vision

The vision of the National and Kapodistrian University of Athens is the constant commitment to four main principles: research, education and training shall be characterized by a quest for high quality and distinction; the University's leading role shall be safeguarded by a constant engagement to innovation and creativity; the academic community members shall participate actively in scientific, social and cultural events; our standpoints shall reflect our historical and contemporary Greek culture worldwide through scientific activities.

**Changes call
for creativity and
innovation; and
innovation leads
to evolution**

Mission and Policy

NKUA is a research University and, as a leading higher education institution since 1837, it aims to advance knowledge and educate students in sciences and arts that will best serve the nation and the community of the twenty first century.

Committed to innovation and academic excellence, we seek to infuse each member of our academic community with the passion of research and knowledge gain. We encourage cultivation of creativity, maturation of social and cultural sensibilities as well as critical thinking, by supporting free and open dialogue and a culture of integrity and diversity.

The University Banner. Ordered by the Senate on the occasion of the celebration of 50 years since the foundation of the University (by Nicholas Gyzis, Munich, 1887). Silk and golden embroidery on velvet (153 x 89 cm). It depicts the Pallas Athina, symbol of the National and Kapodistrian University of Athens, with her distinctive symbols; the spear and the shield with the gorgoneion. Legend has it that Athina petrified her enemies with the gorgoneion, the mermaid-like head of Medusa

Strategic Goals

Evolve

- *Provide innovative and dynamic curricular offerings*
- *Build a transformative global educational experience for students*
- *Implement novel approaches to teaching, learning and research*
- *Prepare for the new technological advances and socioeconomic challenges*

Integrate

- *Realize the value of the resources of a historical University*
- *Capture the advantages of our cultural Athens location*
- *Develop community awareness and institutional responsibility*

Expand

- ***Attract the highest caliber students and faculty***
- ***Enhance the core curriculum***
- ***Propel student academic development and success***

Internationalize

- ***Internationalization of education***
- ***Development of foreign language programs especially for international students***
- ***Internationalization of academic research as a key to innovation***
- ***Encouragement of the University's international presence and recognition***
- ***Engagement in partnerships and University networks***

II. SENATE

The Senate comprises the Rector, the Vice–Rectors, the Deans of Schools, the Chairs of the Departments, and representatives of students and administrative and other staff categories.

III. RECTORAL COUNCIL

The Rectoral Council comprises the Rector, the Vice–Rectors, a students' representative and the Senate's representative of the administrative staff.

Historical Background and University Profile

Historical Background in brief

The University was founded by the Royal Decree of April 22, 1837 under the name “Othonian University” in the honour of its founder, Otto of Bavaria (in Greek, “Othon”), the first king of modern Greece. The Othonian University was renamed to “National University” in 1862, after King Otto was forced to leave the country.

In accordance with the will of the significant donor Ioannis Dombolis, a law was issued on July 17, 1911, with which “The Kapodistrian University” was founded (named after Ioannis Kapodistrias, the first head of the independent modern Greek state). From 1911 until 1932 the University was thus separated into the Kapodistrian University (the humanities departments) and the National University (the science departments).

In 1932, the “National University” and the “Kapodistrian University” were formally

united (Law 5343/1932) into “The National and Kapodistrian University of Athens”, a fully self-governed legal entity of public law. Up to the early 20th century, the NKUA was the only university in Greece which offered degrees in the Medical, Natural and Social Sciences, Law and Economy, Theology, Literature, History and Archaeology.

Throughout its history a number of our students and faculty members have played a critical role in medicine, politics, education, literature and nearly all fields of sciences and arts; we should mention, among others, George Papanicolaou, Hélène Glykatzi-Ahrweiler, Constantin Carathéodory. We are also proud of the two Nobel prize-winners in Literature, Odysseas Elytis and George Seferis, who have studied at the NKUA, and Nikos Kazantzakis who was nominated for the Nobel Prize in Literature in nine different years. Finally our national poet Kostis Palamas had served as Secretary of the University.

The Athens University History Museum

Propylaea

In November 1841 the university relocated at the neoclassical Central Building. Its front wing, also known as the Propylaea, was completed in 1842–1843. The rest of the wings' construction was completed in 1864. Propylaea were founded in 1839 as part of the Athenian Trilogy, a cluster comprising the most renowned neoclassical buildings in downtown Athens – together with the National Library of Greece and the Athens Academy – on the basis of the architectural

drawings of the Danish architect Hans Christian Hansen and decorated by painter Carl Rahl.

Propylaea building is one of the most iconic places of remembrance of Athens.

Its various halls were used for educational purposes but also occasionally have hosted the Hellenic Parliament, the National Library, numerous museums and workshops.

Nowadays the historic building primarily serves administrative and ceremonial purposes.

History at a glance:

- 1837** Founded under the name “Othonian University”. During its first year of operation, it had 33 professors, while courses were attended by 52 students and 75 non-matriculated “auditors”
- 1862** Renamed to “National University”
- 1911** The “Kapodistrian University” is founded
- 1932** Merged and renamed as “The National and Kapodistrian University of Athens”

University Profile

The National and Kapodistrian University of Athens (NKUA) is a public university located in Athens, Greece. Inaugurated in 1837, it has been the first university in the newly established Modern Greek state, as well as in the Balkan and the Eastern Mediterranean area. Its role has been historically and socially decisive for education and promotion of cultural life in the country and beyond.

When inaugurated, it comprised four Schools; Theology, Law, Medicine and the School of “Philosophy and Other Fundamental Studies” (which included applied sciences and mathematics). During its first year of operation, the institution had 33 professors, while courses were attended by 52 students and 75 non-matriculated “auditors”.

For the academic year 2021-22, the NKUA offers 41 undergraduate programs as well as 213 postgraduate programs leading to a Master’s or Doctoral degree. 29 of these postgraduate programs are taught in a foreign language. There is also the English “BA Program in the Archaeology, History and Literature of Ancient Greece”, exclusively for international students; a Medical Degree in English will also operate from the academic year 2022-23.

The University has established 15 Centers of Excellence, 18 Centers of Expertise in Rare Diseases of the School of Medicine, and 5 University Research Institutes. There are also 3 University Hospitals that belong to the NKUA, while 72 Clinics and Departments under the auspices of the School of Health Sciences, operate in NKUA premises and in 16 Athens hospitals.

Furthermore, 275 University Laboratories, 11 libraries, the History Museum of the University, the Historical Archive and 17 thematic museums are used for research and education purposes. Additionally Greek language can be learned as second/foreign language at the Modern Greek Language Teaching Center; also at the Foreign Languages Teaching

Center of the University, 24 languages can be studied and special programs are available in language, translation, as well as legal and medical terminology.

NKUA is a research-intensive University. Our faculty and researchers continuously challenge the boundaries of knowledge. We provide the highest quality learning opportunities for our students embellished by the new knowledge we discover. Research, individual and collective, is a priority for the academic community. Research can be also supported by grants, international and national funds, partnerships with public and private sector bodies, etc.

Additionally, our academic community actively participates in a multitude of scientific, cultural and social events and initiatives, thus strengthening the University’s social impact. Some of the most important contributions of our Institution to the society can be considered: national health, social solidarity, migration policy, gender equality, and social exclusion. Indicative initiatives are as follows: blood and bone marrow donation on a regular basis, “Social Solidarity Oncology Clinic” for patients with cancer without medical insurance, “Health for All” program (<https://www.ygeiagiolous.org>) offering medical, dental, pharmaceutical and psychosocial care to vulnerable social groups, “Solidarity Network for Refugees” offering vaccination and other initiatives, supportive and counseling actions such as “Parental Academies” for schools, and covid-19 information telephone line.

Visit our new HUB for the communication and promotion of the educational, research and social activities of the NKUA.

Featured History

Since 1860, in order to honor distinguished personalities, a significant number of Honoris causa doctorates have been conferred upon persons internationally famous for the advancement of knowledge in sciences and arts. Among others, we should especially mention the **Nobel Laureates**:

- Robert Cecil – Nobel Peace Prize (1924)
- Max Planck – Nobel Prize in Physics (1937)
- Sir Alexander Fleming – Nobel Prize in Physiology or Medicine (1946)
- Odysseas Elytis – Nobel Prize in Literature (1987)
- François Jacob – Nobel Prize in Physiology or Medicine (1991)
- Harry Markowitz – Nobel Prize in Economics (1992)
- Jean-Marie Lehn – Nobel Prize in Chemistry (1992)
- Jean Dausset – Nobel Prize in Physiology or Medicine (1997)
- Paul Crutzen – Nobel Prize in Chemistry (1998)
- Amartya Sen – Nobel Prize in Economics (1999)
- John Nash – Nobel Prize in Economics (2000)
- Louis J. Ignarro – Nobel Prize in Physiology or Medicine (2002)
- Peter Agre – Nobel Prize in Chemistry (2005)
- Derek Walcott – Nobel Prize in Literature (2006)
- Edward Prescott – Nobel Prize in Economics (2007)
- Joseph Sifakis – Turing Prize, considered as “Nobel Prize in Informatics” (2008)
- Harald zur Hausen – Nobel Prize in Physiology or Medicine (2014)
- Jean-Pierre Sauvage – Nobel Prize in Chemistry (2017)

Conferment of the Title of Doctor Honoris Causa upon Mikis Theodorakis, composer, 1996

Except from the Nobel laureates, the title of Doctor Honoris Causa has been conferred upon internationally renowned personalities, distinguished for their contribution to science, literature, arts, philanthropy, public service, as well as political and ecclesiastical personalities, like for example, Charles Émile Picard (1937), George Papanikolaou (1949), Archbishop of Nova Justiniana and All Cyprus, Makarios (1957), William Fulbright (1978), Jacques Delors (1992), Umberto Eco (1995), Thomas Kuhn (1995), Mikis Theodorakis (1996), Archbishop of Constantinople, New Rome and Ecumenical Patriarch, Bartholomew (1999), Vladimir Putin (2001), Avram Noam Chomsky (2004), Archbishop of America, Demetrios (2005), Jean – Claude Juncker (2011), Pope and Patriarch of Alexandria and All Africa, Theodoros II (2012), Hélène Glykatzi-Ahrweiler (2014), François Hollande (2015), Costas Gavras (2017), Frans Timmermans (2017), Marcelo Rebelo de Sousa (2018), Michael Higgins (2018), Frank-Walter Steinmeier (2018).

Academic Structure

SCHOOLS AND DEPARTMENTS

For the academic year 2021–22 the following Schools and Departments offer graduate and postgraduate programs covering a wide range of academic fields:

SCHOOL OF THEOLOGY

- Department of Theology
- Department of Social Theology and the Study of Religion

LAW SCHOOL

SCHOOL OF ECONOMICS AND POLITICAL SCIENCES

- Department of Political Science and Public Administration
- Department of Economics
- Department of Communication and Media Studies
- Department of Turkish Studies and Modern Asian Studies
- Department of Sociology
- Department of Business Administration
- Department of Ports Management and Shipping
- Department of Digital Arts and Cinema

SCHOOL OF PHILOSOPHY

- Department of Philology
- Department of History and Archaeology
- Department of Philosophy
- Department of Educational Studies
- Department of Psychology
- Department of English Language and Literature
- Department of French Language and Literature
- Department of German Language and Literature
- Department of Italian Language and Literature
- Department of Spanish Language and Literature
- Department of Music Studies
- Department of Theatre Studies
- Department of Russian Language and Literature and Slavic Studies

SCHOOL OF SCIENCE

- Department of Physics
- Department of Chemistry
- Department of Mathematics
- Department of Biology
- Department of Geology and Geoenvironment
- Department of Informatics and Telecommunications
- Department of History and Philosophy of Science
- Department of Aerospace Science and Technology
- Department of Digital Industry Technologies

SCHOOL OF HEALTH SCIENCES

- School of Medicine
- Department of Dentistry
- Department of Pharmacy
- Department of Nursing

SCHOOL OF EDUCATION

- Department of Primary Education
- Department of Early Childhood Education

SCHOOL OF PHYSICAL EDUCATION AND SPORT SCIENCE

SCHOOL OF AGRICULTURAL DEVELOPMENT, NUTRITION AND SUSTAINABILITY

- Department of Agricultural Development, Agrofood and Management of Natural Resources
- Core Department¹

¹ The Core Department offers no Bachelor Degree; only postgraduate programs (Law 4589/2019).

Study Programs

Undergraduate Studies

Students are accepted into a School/Department according to Greek Law requirements for Public Universities.

Undergraduate students must complete 8 semesters of study, and accumulate a total of 240 ECTS in order to obtain a Bachelor's degree corresponding to level 6 of the European Qualifications Framework.

In some Schools/Departments, the duration of studies is 10 semesters such as in the Department of Dentistry, the Department of Pharmacy and the Department of Music Studies. Finally, in order to obtain a Bachelor's degree in Medicine, a study period of 12 semesters is compulsory.

41 undergraduate programs
213 postgraduate programs
410 e-learning programs

The courses offered by each Department are described in its curriculum, which is constantly upgraded to meet new technologies and standards. According to each curriculum's requirements, students may also have to participate in specific laboratory experimental courses they also have the opportunity to select some courses from wider thematic cycles, participate in workshops, seminars, outdoor activities, etc. A number of ECTS credits and a weight factor correspond to each course.

A Bachelor's degree is obtained after calculating the curriculum's credit-weighted average, derived according to each Department's requirements; the Grading system has the

following ranges: Excellent (8.50 – 10.00), Very Good (6.5 – 8.49), Good (5.00 – 6.49).

Courses are taught in Modern Greek, while seminars may be organized in English or other foreign languages. Foreign language and literature Departments offer all courses in the language of the program while the rest of the Departments offer courses in English for International students.

Aiming at widening international students' participation, the NKUA introduced in the academic year 2020-21 the **"BA Program in the Archaeology, History and Literature of Ancient Greece"**, the first undergraduate program in a Greek University that is especially designed for international students and all its courses are taught in English.

From the academic year 2022-23 a Medical Degree program in English will be offered, exclusively addressed to foreign nationals. Eligible applicants should have attended the final two classes of high school (or equivalent school) in a foreign country, and should have a high school -or other equivalent secondary education- diploma that entitles them to admission to higher education institutions in the country where they graduated.

NATIONAL AND KAPODISTRIAN UNIVERSITY OF ATHENS
SCHOOL OF PHILOSOPHY

Study Classical Greece in Athens

Postgraduate Studies

A) Leading to a Master's degree

Students may select among 213 postgraduate programs, from which:

- 158 are organized by a single Department of the University (departmental),
- 16 are interdepartmental programs, between two or more Departments of the University,
- 28 inter-institutional programs which are organized in collaboration with other Greek Higher Education Institutions and major research institutions
- 8 European/interstate programs in collaboration with foreign Universities
- 3 programs in the framework of Erasmus Mundus Joint Master Degree.

Encouraging internationalization in education there are currently 29 master programs all the courses of which are taught in one or more foreign languages (English, French, German, Italian).

The duration of full-time postgraduate studies in NKUA may vary from two (2) to six (6) semesters with each semester corresponding to 30 ECTS (level 7 of the European qualifications Framework). Each program is organized in semesters and includes lectures, tutorials, research activities, seminars, laboratory practice, clinical training, fieldwork, stage, master dissertation, etc.

Postgraduate programs are either funded by the State or offered on a tuition-fee basis.

B) Leading to a Doctoral degree

Postgraduate students can be enrolled in a Ph.D program which is organized by the NKUA academic departments.

Doctoral students should complete their thesis within a minimum of a 3-year period.

Moreover, the University has established Cooperation Agreements with other European Universities for the co-supervision of Ph.D theses.

Postdoctoral Studies and Research

The NKUA fosters cooperation with scientists in order to conduct postdoctoral research in the scientific areas of each Department. Such cooperation mainly refers to providing supervision or support by a three members committee of the host Department, enabling access to scientific material and equipment or assigning specific research projects.

Summer Schools

Occasionally, summer schools are organized in special areas of interest, which are popular to a large number of students like, for example, the "Athens EU Summer School" offered by the Department of Political Science and Public Administration. During the 4 consecutive years of its functioning, 150 students from 25 countries have attended the summer school.

Furthermore, the "Summer Course in Modern Greek Studies" is a summer program established in 1988 in celebration of the 150 years of the founding of the National and Kapodistrian University of Athens.

Law School students' team awarded in Manfred Lachs Space Law Moot Court Competition

Featured History – Special Achievements and Awards

The NKUA encourages its graduates and postgraduates to participate in international competitions in the scientific field of their studies. Recent, indicative examples of NKUA student teams that have excelled in Olympiads and International competitions with the guidance of our academic staff, can be considered the following:

- Students of the Department of Mathematics were awarded with 5 medals (4 gold, 1 silver) in the International Mathematics Competition (IMC, 2021), where 590 students from 49 countries participated.
- Student team of the Law School was ranked 1st among 21 universities worldwide in defendant's pleadings in the Leiden Sarin International Air Law Moot Court Competition (Seoul, 2018).
- Student Team of Law School was ranked 3rd in Manfred Lachs Space Law Moot Court Competition (2021, European Round).
- The iGEMAthens 2019 research team of Synthetic Biology, an interdisciplinary group of students from NKUA and NTUA, was awarded with a gold medal in the International Genetically Engineered Machine competition (iGEM2019) in Boston, under the auspices of MIT. iGEMAthens 2019 succeeded also to be nominated for the Best New Application award.

The program's purpose is to familiarize foreign students (Hellenists) with Modern Greek Culture, the Modern Greek Language, Literature, History and Art.

This program is the largest organised in Greece, both with regard to the duration of studies and the number of participants.

Since 1988, 6,460 students from 654 educational institutions from 78 countries have participated in the program.

Finally, summer schools are organized for specific international students' groups under special University agreements, like the 3-week program "Encounter with the Greek Culture and Wisdom" for students from the University of Chinese Academy of Social Sciences (July, 2019).

UCASS Students, Summer School (Sounio, July 2019)

Facilities and Services

We offer a range of facilities and services and support to undergraduate and postgraduate students. Indicative ones are listed as follows:

Counselling Services	Support services	Studying and Leisure facilities
Student Ombudsman	Accessibility Unit for Students with Disabilities	9 School Libraries and 2 Libraries at the University Club
Psychosocial Intervention Unit	Student Support Fund	University Club
Advisory Office – School of Theology	Students' Halls of residence	Computer and multimedia Center
Advisory Office – Department of Primary Education	Student meals service	Foreign Languages Teaching Center
Community Mental Health Center	Medical care	Modern Greek Language Teaching Center
Coeval Counselling Center	Scholarships – Awards	University Gym and Sports Center
10306 - Covid-19 phone line for psychological support	Job-seeking assistance	Student Cultural Society

Modern Greek Language Teaching Center

The Modern Greek Language Teaching Center of the National and Kapodistrian University of Athens has been operating since 1950, initially with a very limited number of students. Gradually, there has been an impressive increase in the number of students and nowadays the Modern Greek Teaching Centre is the largest of its kind in the world. The last 5 academic years, 5,379 students from 86 countries have attended the Modern Greek Language Teaching Center.

Many of its graduates are currently teachers of Modern Greek language and Philology, diplomats, ecclesiastical personalities, renowned scientists, company managers, business professionals, respected artists, etc. throughout the world.

The Center also organizes each month guided tours to museums and archaeological sites as well as excursions to areas of historical interest (Sounio, Delphi, Mycenae, Nafplio, Epidauros). More information on <https://en.greekcourses.uoa.gr>.

The University Swimming Pool – Gym

Foreign Languages Teaching Center

The Foreign Languages Teaching Center was established in 1931 and, initially, it operated as part of the University Club. Since its establishment, the main aim of the Center has been the teaching of foreign languages, which, for many years, was restricted to certain widely spoken ones such as English, French, German and Italian and later on, to Spanish and Russian. In 1994 it became a fully independent academic unit, governed by its own Administrative Board.

The academic year 2020-21, 2,030 students were registered to the Center in order to learn 24 languages: English, Albanian, Arabic, Bulgarian, French, German, Danish, Japanese, Hindi- Sanskrit, Spanish, Italian, Chinese, Korean, Norwegian, Dutch, Persian, Portuguese, Polish, Russian, Serbian, Swedish, Turkish, Czech and Finnish. The last 5 years a total of 10,985 students have been registered to learn up to 28 foreign languages.

In addition, special programs are available to anyone wishing to specialize in linguistics, translation, legal or medical terminology, etc. More information on <https://www.didaskaleio.uoa.gr>

Libraries and Information Center

The mission of the Library and Information Center is to support and enhance the educational and research activities of

the University, to manage and distribute specialized scientific information to the Academic Community and to participate in every educational and cultural activity.

Nine central libraries, each belonging to the corresponding School of the University are available to faculty and students. The Computer Center is also an integral part of the Library and Information Center.

The Library and Information Center's collection consists of more than 1,000,000 items (books, periodicals, maps, cd-roms, etc.).

The NKUA is a member of the Hellenic Interlibrary Loan Network. The network was developed through the Hellenic Academic Libraries Link and is the official cooperation between organizations which are responsible for the operation of libraries & information services and interlibrary loan service in Greece and Cyprus, through the "IRIS" platform. It also cooperates with the National Documentation Center for ordering of articles. In addition, in cooperation with Libraries such as the British Library Document Supply Center (BLDSC) and SUBITO (German Libraries), the National Documentation Center handles international requests.

The Library and Information Center handles "PERGAMOS", the unified Institutional Repository/Digital Library of the University of Athens where Ph.Ds, undergraduate and postgraduate theses are deposited (<https://pergamos.lib.uoa.gr/>). Electronic publication (e-publishing) of the NKUA journals is supported by the Library and Information Center. The e-publishing platform hosts scientific journals in digital format, which are produced, published or edited by NKUA (<http://epub.lib.uoa.gr/>). Some

The Library of the School of Philosophy

Concert in the yard of the Athens University History Museum

of the Libraries have study rooms for Students with Disabilities, supported by the Accessibility Unit for Students with Disabilities of the NKUA. Finally, 2 more Libraries belonging to the University Club are also available to students.

More information on <https://www.lib.uoa.gr/>.

Museums

The History Museum of the National and Kapodistrian University of Athens is the focal cultural unit of the NKUA that promotes, fosters and highlights our University's history. The History Museum is located in the neo-classical historical building on the north slope of the Acropolis hill that dates before the 18th Century which formally was the residence of the architect Stamatios Kleanthis and later on (for the period 1837–1841) it served as the premises of “The Othoneion University”.

In 1987 the History Museum was inaugurated. The mission of the Museum is to strengthen the relations between the University of Athens and society as well as to highlight the history of the University.

Its collections consist of old and rare book editions, manuscripts, diplomas, scientific instruments, portraits, photographs, medals, seals and other University memorabilia. Permanent exhibitions are hosted and cultural and scientific events are organized to highlight the history of education and research in Greece, for example, the exhibition “The Banner of the University of Athens – Modern Visual Approaches”. In addition, periodic exhibitions, theatrical and musical performances are hosted in its courtyard during the summer period. The museum also participates in international events for the protection and enhancement of the university heritage. Indicatively, it is a member of the European network UNIVERSEUM European Academic Heritage Network and in 2015 it

hosted the 16th UNIVERSEUM Conference in Athens with the participation of universities from 16 European countries.

NKUA has also 17 thematic museums, which belong to specific Schools or Departments of the University.

1. Museum of Anatomy / Collection of George Papanicolaou

It was founded in 1877. King Otto donated the famous anatomical tables of Weber and Mascani. The Valsamakis collection was housed in the museum after its donation from the Ionian Academy. The anatomical museum includes a rich collection of dry bones, 100 skulls, brain slices, skeletons with exostoses, bones with anomalies, fetuses with clefts and malformations, vascular and nerve preparations, formalin embalmed organs with their vascularization and nerve supply and a rich collection of old surgical instruments.

February 2014 marked the 52th anniversary of the death of George Papanicolaou, the inventor of the Pap test for cervical cancer screening. Among the exhibits, there are rare photographs from Papanicolaou's life, his awards, the plan of the last Greek banknote and his portraits. The central part of the exhibition includes photographs, letters and other documents about the scientific work of Papanicolaou.

2. Museum of Anthropology

It was founded in 1886 and has constituted the most important center for the development of Anthropology in Greece and even in Europe. The main part of the Museum of Anthropology scientific collections consists of skeletal series

that cover all periods of the ancient Greek world. These collections have been the subject of systematic anthropological studies conducted by important Greek and foreign anthropologists, who have developed fundamental principles of the ethnogenesis, the shaping and the evolution of the Helladic population.

3. Museum of Criminology

Founded in 1932, it is the first University museum in Greece dedicated to Criminology and to Forensic Sciences in general. It illustrates the history of crime by presenting some of the most notorious crimes that took place during 19th and early 20th centuries. The Museum's collections include a rich source of data for researchers in forensic medicine and toxicology, and other forensic sciences, and also areas of sociology that focuses on the study of crimes and their causes, effects, and social impact.

4. Museum of Pharmacology

Inaugurated in 1998, the museum organizes educational materials and research equipment in biochemistry and pharmacology.

5. Museum of the Department of Dentistry

Opened for the public in 2013, it is one of a kind in the Eastern Mediterranean area. It handles the collection and study (recording, documentation, evaluation) of dental evidence in Greece. The main exhibition hall includes dental instruments dated from the 19th century (dental drills, tooth forceps, instruments used in operative dentistry, instruments and appliances for dental prosthesis, dental handpieces and a very rare dental unit with an even more rare dental light).

6. Museum of Archaeology and History of Art / Archaeological Park

Founded in the early '30s, it contains more than 8,800 items of exhibit. These are copies or originals that have been donated or lent to the museum for a specific time period. A fully equipped Maintenance Unit has been operating since 2010. The Museum is a member of the International Council of Museums (ICOM) and regularly participates in activities such as the International Museums Day and the European Days of Cultural Heritage. The Museum includes collections of the Pre-Historical and Classical Archeology, remarkable collection of Sculptures, Byzantine Painting and Pottery, etc. Art of recent period is represented by paintings of significant Greek painters, who are occasionally lent to exhibitions outside the University. The archaeological park is pioneer regarding the monitoring of excavation findings and exhibits from the area of the Syndagma Square during the Athens Metro excavations.

7. Museum of Education

It was founded in 1993. The aims of the Museum are the research, study and preservation of the cultural heritage in the Sector of Education. Its first exhibition was held in 2000.

8. Museum of Biblical and Christian Archaeology

It was founded in 1969. Important casts derived from the Louvre museum are included in its collection: the Hammurabi Code, the Column of medium and the obelisk of Shalmaneser III.

Museum of Archaeology and History of Art

9. Botanical Museum / Diomidous Botanical Garden

The Botanical Museum became independent in 1868. Its predecessor was the old Physiographic Museum, founded in 1850, which included the botanical, zoological and mineralogical collections of the University.

The Diomidous Botanical Gardens are a unique ecosystem housing both wild and cultivated species (organized by geography and theme). A historical plants section offers up species mentioned in Greek mythology and the Old Testament, such as the laurel dedicated to Apollo (*Laurus nobilis*), the ivy dedicated to Dionysus (*Hedera helix*) and the narthex (*Ferula communis*), the giant fennel stalk in which Prometheus hid fire stolen from Zeus. The Gardens, established in 1952, cover an area of 1,860,000 sq.m. and maintain 2,500 plants from Greece and around the world. The Herbarium includes 19,000 dried plant samples, most from protected areas belonging to the NATURA 2000 network. The Diomidous Botanical Gardens are a member of the Botanical Gardens Conservation International (BGCI). More than 200 schools visit the Gardens every year. Weekend visitors to the Garden are estimated at 40,000 each year.

10. Museum of Zoology

The Museum's collections include mammals, birds, reptiles, amphibians, fish, marine invertebrates, snails, insects and other

invertebrates from Greece and other countries as well as anthropological findings. Approximately 10,000 persons visit the Museum every year, mostly children from primary and secondary education.

11. Museum of Mineralogy and Petrology

The original collections of the Mineralogy and Petrology Museum were created at the Natural History Society that was established in Athens in 1835. The University acquired the collections in 1837. The University Museum of Mineralogy–Petrography was created in 1908 and contains the oldest collection of minerals and rocks in Greece.

12. Museum of Natural Sciences and Technology

The building's foundation ceremony was held on June 6, 1887 and in the foundations a glass cylinder was placed containing a gold Greek coin and a membrane with the writing: "Dedicated to scientific work, which should be further dedicated to the country". The old Museum's premises were the "Old Chemistry Laboratory" of the University. Nowadays its stored collection preserves more than 10,000 valuable scientific instruments. The Museum also possesses the archive of the University of Smyrni, which Konstantinos Karatheodori saved and brought in Greece. The library of the Museum includes more than 25,000 books and journals from the last two centuries.

Museum of Zoology

13. Museum of Paleontology and Geology

The collection of the Museum of Paleontology & Geology includes fossils of animals and plants from all over Greece, thus covering more than 300 million years of the geological history of our country. The collection is very rich, with samples recovered since the late 19th century, and it is distinguished for the excellent preservation and uniqueness of its exhibits. It also includes samples from abroad, micropaleontological and stratigraphic collections, and paleoenvironmental reconstructions.

14. Museum of Physiology “George Kotzias”

The collections of the Museum are classified into thematic areas and particularly there are two (2) specialized collections: a) the collection of historical instruments of Physiology and b) the collection of G. Kotzias historical archive.

15. Museum of Informatics and Telecommunications

The Museum of Informatics and Telecommunications of the National and Kapodistrian University of Athens was founded in the fall of 2019 and is currently under construction.

It will host a permanent, modern exhibition space, based on contemporary museological practices, which will introduce the public to the world of computational thinking in a creative way. It will also host periodical exhibitions (photography, sculpture, special tributes, etc.) inspired by technology topics.

16. Pathology Museum - Rokitanski Collection

It hosts the historical 19th century Rokitanski collection of pathology specimens. It dates from 1850 and was an integral part of the historical Laboratory of Pathologic Anatomy since its foundation. The Rokitanski collection has gradually enhanced over the past centuries, to include over 2,500 specimens to date, of which 1,000 are displayed at the Pathology Museum.

17. The Folklore Museum and Archive

It numbers more than 4,000 files of manuscripts of folklore material from different regions in Greece, Cyprus and the Greek diaspora that are related to the documentation of various aspects of Greek folklore culture in the language idiom used by the informants. It includes also Archive of Documents dating from the 18th and the 19th centuries that concern statutory laws, a Microphotography Archive, a Musical Material Archive, a Vocal Archive, and an Archive of Autobiography and Narration of the Lives of Refugees, Migrants and Greeks of the Diaspora.

Finally, the **Historical Archive** of the NKUA was established in 1991 and is a research center of the University. The purpose of the Historical Archive is to preserve, organize and manage the archives since the establishment of the University of Athens (1837). This material constitutes a research infrastructure for the study of the history of the University and of Greek and European History in general. The collection of the Historical Archive (approximately 2,000,000 sheets) is accessible at its premises in the center of Athens. More information on: <https://en.historymuseum.uoa.gr/athens-university-museums.html>.

University Hospitals and Departments

The University Hospitals, “ARETAIEIO” and “AIGINITEIO”, are self-governed Institutions, bequeathed to the National and Kapodistrian University of Athens by the donors “Th. Aretaios” and “D. Aiginitis” respectively. They are administered by independent Executive Boards according to their bylaws and are supervised by the Rector and the Senate of the NKUA. Providing high quality health services, and contributing notably to the field of medical education and clinical research, they have earned widespread recognition.

Several Departments, clinics, laboratories and supporting units function in the two hospitals; they offer not only specialized health services to the public but also contribute significantly to medical education and clinical research.

In addition, the “EVGENIDIO” Hospital was founded in 1975 by A. Eugenides. Currently a number of Medical School departments and clinics operate at its premises.

The University Hospitals have been offering specialized health services to the public for many years. Furthermore, they made significant contributions to medical education and clinical research.

A thriving educational and research activity is carried out in the 72 departments and clinics of the School of Health Sciences. They are coordinated as follows:

- Sixty two by the School of Medicine
- Five by the Department of Nursing
- Five by the Department of Dentistry.

They operate in hospitals of Athens (Attikon, Evangelismos, Hippokrateion, Laikon etc.) or in the related Academic Departments’ premises.

"Aretaieio" and "Aiginiteio" Hospitals

University Laboratories

Faculty, researchers and students of the NKUA are dedicated to research activities throughout the year. A total number of 275 University Laboratories are distributed in all relevant Schools and Departments serving educational as well as fundamental and applied research purposes.

Church of Kapnikarea

In 1932 the Church of Kapnikarea was granted to the University of Athens, directly linked to the School of Theology. Built in the 11th century, it is a Byzantine

Church of the “Presentation of Virgin Mary” and Saint Barbara. The original building is the cruciform church with a dome supported by four pillars with Roman capitals.

Public and International Relations

Introduction

Public and International Relations are responsible to effectively communicate the University's strategic plan to its stakeholders and the international community. The Directorate of Public & International Relations & History is the hub of the University's prominence, since it supports its dynamic educational, intellectual and servicing missions by providing timely and useful information to all its internal and external stakeholders and audiences.

A wide range of activities are carried out by academic staff, researchers and students and corresponding events are hosted. Such events include, among others, awards of Excellence and Prizes to distinguished scientists and students, Honoris causa doctorate awards, jubilees and anniversaries, social, cultural and other events and celebrations (music events, theatrical performances), conferences, seminars, lectures of academic interest.

Furthermore, cooperation agreements with foreign higher education institutions are supported; the active involvement in the ERASMUS+ Program; and the maintenance of the participation in international university organizations, associations and networks.

In addition, a Press Office is the main point of contact for journalists on the local, regional and international levels.

Internationalization– Bilateral cooperation agreements

Internationalization is one of the cornerstone goals of our University's ten-year strategic plan. We actively promote worldwide networking at an institutional level. The NKUA collaborates with universities, research centers, university networks, as well as international educational organizations in order to develop common practices, strengthen research collaborations and encourage mobility of students, researchers and academics. International Bilateral Agreements have been signed with peer Universities -primarily public ones- or equivalent institutions of higher education and research, such as CERN (Conseil Européen pour la Recherche Nucléaire - Switzerland) and A*STAR (Agency for Science, Technology and Research - Singapore).

Currently there are 69 active Agreements of the NKUA with Universities and Institutions from 29 countries world-wide, additional agreements with partner Universities for students' mobility and agreements between specific Schools/Departments.

Following the strategic plan regarding the University's extroversion, the Rectoral authorities have constant courtesy visits by Ambassadors of foreign countries to Greece, government representatives, as well as delegations of foreign Universities in order to explore further collaborations, discuss new cooperation agreements and/or participate in joint research programs.

Welcome ceremony of the international students of the "BA Program in the Archaeology, History, and Literature of Ancient Greece", with the presence of Minister N. Kerameus.

It is worth noticing that Ambassadors, Educational and Cultural Attachés, Ministers and parliament members from the following countries visited the Rectorate of the NKUA: Afghanistan, Algeria, Armenia, Azerbaijan, Brazil, Chile, China, Czech Republic, Cuba, France, Georgia, Germany, India, Indonesia, Iran, Iraq, Ireland, Japan, Jordan, Korea, Luxembourg, Mexico, Norway, Poland, Portugal, Romania, Russia, Slovakia, Taiwan, Turkey, Venezuela, Furthermore, University delegations from China, Korea, USA, Russia, Georgia, Ukraine, Norway, Belgium, Singapore, Taiwan, etc. visited both the Rectorate and individual Schools/Departments of the University seeking potential cooperation.

Especially after discussions with representatives of Chinese Universities (Beijing Foreign Studies University (BFSU), Guangdong University of Foreign Studies (GDUFS), Tianjin Foreign Studies University (TFSU), University of Chinese Academy of Sciences (UCASS) and Southwest University (SWU), bilateral agreements' extensions were signed for joint education programs of Greek Majors to the School of Philosophy for an entire academic year, as well as for the organization of summer schools for Chinese students.

Scholarships

The University offers a number of scholarships from bequests, legacies and donations. In 2020, in the context of fulfilling the will of 108 donors, the University allocated 1,2 million euros in scholarships to undergraduate and postgraduate students, as well as PhD candidates for studies in Greece and abroad. In addition, partner Universities often offer scholarships to NKUA students for graduate and postgraduate studies or in order for the students to participate in summer schools at the foreign University.

Furthermore, the NKUA is the only Greek University which, since 1993 participates in the Ryoichi Sasakawa Young Leaders Fellowship Fund (SYLFF) program, funded by the Nippon Foundation and administered by the Tokyo Foundation for Policy Research. This fellowship program is offered to selective 69 Universities from 44 countries worldwide and it "provides fellowships to the "best and brightest" postgraduate students with leadership potential and commitment to making the world a better place for all...". Until now more than 300 fellowships have been offered to NKUA students.

Orientation Day for Erasmus and International Students in the Great Hall of the University

Participation in International Organizations, Associations and University Networks

The NKUA participates in international organizations, associations and university networks, which aim to promote international cooperation between Universities and develop methods and strategies in order to improve their educational and research activities. The NKUA is a founding and active member of the following 3 University Networks:

- UNIMED (Mediterranean Universities Union) <https://www.uni-med.net>
- UNICA (Network of Universities from the Capitals of Europe) <https://www.unica-network.eu>
- BSEMAN (Black Sea and Eastern Mediterranean Academic Network) <https://bseman.org/>

It also participates as a member in the following 7 international associations and networks:

- IAU (International Association of Universities) <https://www.iau-aiu.net>
- EUA (European University Association) <https://www.eua.be>

- EAIE (European Association for International Education) <http://www.eaie.org>
- UNEECC (University Network of the European Capitals of Culture) <https://www.unecc.org>
- IIE (Institute of International Education) <http://www.iie.org>
- BUA (Balkan Universities Association) <https://www.baunas.org>
- SUN (Silk-road Universities Network) <https://www.sun-silkroadia.org/>

Furthermore, academic units (Schools and Departments) and their representatives are active members of specialized international academic associations and networks.

The NKUA is a signatory of the “Magna Charta Universitatum” and its statement of fundamental values since 1988.

Finally, it should be noted that our University has three UNITWIN (University Twinning and Networking)/UNESCO Chairs as follows:

- UNESCO Chair and Network on Sustainable Development Management and Education in the Mediterranean (MEDIES)
- UNESCO Chair in Adolescent Health Care
- UNESCO Chair on Climate Diplomacy

Erasmus+ Program

*Internationalization of Education:
it enhances the overall quality of education,
broadens horizons, increases employability
and prepares students to become
global professionals*

The NKUA has actively been involved in students and academic staff mobility between European universities through the program Erasmus, which then continued as ERASMUS+. Since the beginning of Erasmus (1987) the NKUA has been actively participating in the program; More than 6,300 incoming students from 38 countries and 15,300 outgoing students have been enrolled in the program since then. Also, the Erasmus program gave the opportunity to 815 professors of the NKUA to strengthen their research collaboration with colleagues of partner Universities.

As regards student mobility, every year the NKUA encounters an increase of incoming students for studies and traineeship.

We continue to encourage this mobility since students and staff members that participate in Erasmus acquire valuable experience when studying or teaching in diversified academic, social and cultural environments. Incoming Erasmus students are encouraged to participate in all educational and cultural activities of the NKUA. They are also offered the possibility to attend free Greek language courses at the Modern Greek Language Teaching Center of the NKUA. Moreover, they are encouraged to attend the innovative interdisciplinary course offered by the School of Philosophy (Department of Theatre Studies) under the title: "Contemporary Greece: History, Arts and Letters".

Finally, NKUA actively participates in other Key actions of ERASMUS+, such as: Co-operation for Innovation and the Exchange of Good Practices, Support for Policy Reform, as well as in Jean Monnet and Sport actions.

CIVIS: European Academic Alliance

The NKUA also participates in the CIVIS pilot project for the "European Universities" funded by the European Commission, which aims at bringing together 384,000 students and 55,000 staff members from 8 Universities and 8 European countries. Developing CIVIS in the face of global challenges (rather than the prism of conventional disciplinary separations) stimulates the emergence of a culture of collaboration and requires innovative pedagogies that encourage critical thinking, adaptability and resilience. Eight Universities from eight different countries joined forces to build this European Academic Alliance: Aix Marseille Université (France), National and Kapodistrian University of Athens (Greece), University of Bucharest (Romania), Université Libre de Bruxelles (Belgium), Universidad Autónoma de Madrid (Spain), Sapienza Università di Roma (Italia), Stockholms Universitet (Sweden), Eberhard Karls Universität Tübingen (Germany). A new member of CIVIS is the University of Glasgow, (Glasgow, United Kingdom), while the Paris Lodron Universität Salzburg (Salzburg, Austria) will also soon join the alliance.

Research and Innovation

Objectives and Strategy

Research and research-led teaching are considered as primary responsibilities of the faculty, postgraduate students and researchers. The University encourages the production, publication and dissemination of research.

The research topics investigated are diverse and include arts, business, economics, education, informatics, law, medical and health sciences, science and theology. The advancement of knowledge contributes also to better public policy, improved health outcomes, social cohesion.

Postgraduate students also significantly contribute to the NKUA's research activities while studying for higher degrees. In fact, a main objective of the research-led teaching is to develop research skills to postgraduate and undergraduates who, as part of their studies, should also practice in laboratories and/or clinics, participate in conferences with paper presentations, discussions, seminars, excavations, final written assignments etc, depending on their area of study.

Furthermore, we promote the implementation of research projects at doctoral and post-doctoral levels, by scientific groups and individual researchers of the University in collaboration with researchers of other institutions in Greece and abroad.

Research opportunities may also arise from the engagement of University members in business and industry and the identification, mapping, promotion and economic exploitation of research results, the safeguarding of intellectual property through the acquisition of patents and the establishment of spin-off companies.

Research in figures

The Special Account for Research Grants (SARG), which is directed by the Research and Management Committee, plays an essential role in managing all the projects of the National and Kapodistrian University of Athens, at an administrative and financial level. The main sources of funding at NKUA are European, international and national funds, like the Partnership Agreement (PA) for the Development Framework, 2014-2020 (European Structural and Investment FundESIF), Horizon 2020, partnerships with public and private sector bodies, the provision of services to legal entities and individuals, grants, donations and others (Diagram 1).

For the accomplishment of the projects managed by SARG, about 5,000 to 8,000 researchers work full time or part time per year. Among these researchers, except from faculty and the University's permanent staff, there are young researchers such as Ph.D students, researchers, technicians and other supporting staff. The funding of these projects plays a crucial role in the research policy of the University, the reduction of young scientists' unemployment and the decrease of the brain drain of our researchers. The breakdown of staff employed in projects per year for the period 2015-2020 is shown in Diagram 2.

Diagram 2: Personnel employed in projects per year

Currently, the Special Account for Research Grants manages more than 3.800 active projects. The number of the newly approved SARG programs per year since 2015 is presented in Diagram 3.

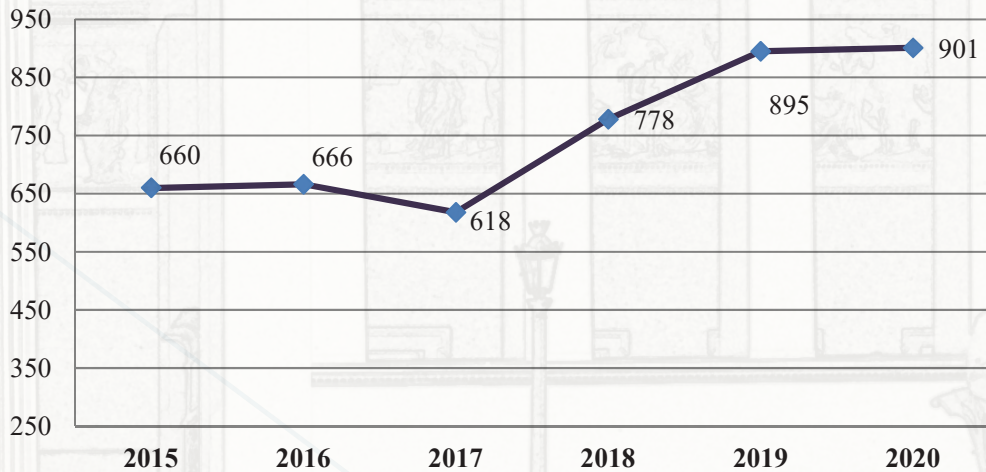

Diagram 3: Number of the newly approved SARG programs per year

***Excellence is never an accident.
It is always the result of high intention,
sincere effort, and intelligent execution;
it represents the wise choice of many
alternatives – choice, not chance,
determines your destiny.***
